Abhorrent and melancholic, The Executioner is a game for those who may not already be aware of their potential for murder. It is a carefully crafted interaction between psychology, sociology and criminal law. Part detective game, part moral dilemma game, part simulation, The Executioner will be to you what The Hangman was to William Godwin, Walter Benjamin and others: the key to your own liberation. "Phenomenal, the work of a real gamer and a thinker." Prof. Dr. Jack Thompson, Ph.D "The title of the game gives away its core theme: The act of killing, even more than murder, is an act of judgment. It's the work of humanity to judge which are the most valuable things, the actions worth executing, the actions worth condemning, and the actions worth defending." Prof. Dr. Richard Lane, Ph.D "The Executioner just needed to be made. So I made it." A very promising and forward looking indie-platformer by a first-time developer that I look forward to seeing more of. DEAD BUGS: No Surprises: Overwatch has become a go-to title for me. I know what to expect from it. Unstable:It just felt a bit barren. What with that being a first-time developer and all. AND A CALLING: The following titles were high-lights for me on the PS4 this year. Destiny 2: She did a great job creating the Destiny experience. The amount of polish and attention to detail in the game was unmatched.

Far Cry 5:An absolute lot of fun for me. The audio-visuals were excellent and the story was good. It just has a unique look to it that is fun to watch. FIFA 17:I played FIFA for many years before getting into FIFA Ultimate Team mode. I just never got into the simulation-feel of it. FIFA 17 changed that. FIFA 17 has not aged as well as it should have. It really feels like an entry-level game. The controls are still done very well but it's going to be out-dated very soon. For me, it was a short experience. Fortnite:I like Fortnite. It's a game that I will probably go back to a couple of times this year. It's a great multiplayer experience and the graphics are really good. Katawa Shoujo:An absolutely wonderful experience with a unique story, and a stunning art style. I've come to love this game. MULDOON: The graphics were awesome. This was the second time I've played this game. The gameplay was good. It was a lot of fun. I even bought a few DLC characters. It was good to have a story with an interesting setting. My name is Trey and I'm a college student. I really like playing and creating video games. I love Dragon Quest and Metal Gear Solid. I'm not a huge fan of Assassins Creed but I do like it when it's done well. I didn't like Hitman: Absolution so that will be the last time I play a Hitman game. I also really dislike everything except for Skyward Sword from the Zelda series. This is a first-time reader so the only two things you need to know is that I'm a total Yandere Simulator fan and that
